## 8.2. Exposure controls

|  |   |
|--|---|
| <b>8.2.1. Appropriate engineering controls</b> | Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapours below their respective threshold limit value. Ensure eyewash stations and safety showers are close to the workstation location.  |
| <b>Eye / face protection</b>                   | Avoid contact with eyes. If splashes are likely to occur, wear: safety glasses with side-shields. Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. The following protection should be worn: Wear chemical splash goggles. Personal protective equipment for eye and face protection should comply with European Standard EN166. |
| <b>Skin protection - Handprotection</b>        | Rubber gloves. Choose gloves to protect hands against chemicals depending on the concentration and quantity of the hazardous substance and specific to place of work. For special applications, we recommend clarifying the resistance to chemicals of the aforementioned protective gloves with the glove manufacturer.  |
| <b>Respiratory protection</b>                  | No personal respiratory protective equipment normally required. In case of insufficient ventilation wear suitable respiratory equipment.  |
| <b>8.2.3. Environmental exposure controls</b>  | Prevent further leakage or spillage if safe to do so.   |
